

New England Multi-Hazard HAZUS Workshop September 19, 2002

- Logistics:
 - Federal Regional Center
 - 63 Old Marlboro Road, Building A
 - Maynard, Massachusetts 01754
 - 9:30 AM – 3 PM (registration begins at 9:00 AM)
- Workshop Vision:
 - Demonstrate a prototype approach for implementing HAZUS in New England and using HAZUS for mitigation planning and disaster response planning.
- Workshop Mission:
 - Overview of HAZUS software capabilities.
 - Scenario examples from Hampton, NH HAZUS project.
 - Implementing HAZUS in New England.
- Agenda:
 - HAZUS Overview
 - Hampton, New Hampshire Project Overview
 - HAZUS As A Multi-Hazard Mitigation Tool
 - Break-out Groups by State to Implement HAZUS
- HAZUS is a natural hazard loss estimation methodology implemented through PC-based Geographic Information System (GIS) software developed by the Federal Emergency Management Agency.
- HAZUS User Groups are cooperative ventures between public and private organizations that use HAZUS software and technology to build disaster resistant communities.
- For more information regarding HAZUS visit:
 - www.fema.gov/hazus or www.hazus.org
