Hey Senator!

Hope you are feeling much better these days.

I write to ask your special attention to the FEMA maps that have been redrawn on a portion of the Congaree River near Columbia. What we want is for the long term impact of flood damage potential to be the primary consideration.

This mixed use development will have huge positive economic impact. And the issue of floodway construction needs to be carefully studied to insure the best science is applied to this decision by FEMA.

All the Best,

[REDACTED] Co-Founder
