RE: Congaree River Appeal
Lexington County, S.C.

Dear Mr. Buckley:

We are writing in follow up to our discussions with representatives of Dewberry and Davis and Doug Bellomo of your office concerning our data submission of October 23, 2000. The appeal data was based on the floodway model for Richland County, which as we understand it will be the effective floodway model for the final maps. Also, the "n" values determined and inserted in our revised HEC-2 model were computed based on an average value of vegetative conditions for the entire 7550 foot reach length as explained in our two submittals.

Thank you for your assistance in this matter. If you have any questions concerning this data or if we can be of further assistance, please do not hesitate to contact us.

Sincerely,

BRASWELL ENGINEERING, INC.

cc: Mr. Doug Bellomo
Mr. Todd Davison
